

For Immediate release:

Cordova Coolers and QUWF Partner for Wildlife Restoration and Youth Outdoors

Buffalo MO: Cordova Coolers and the Quail and Upland Wildlife Federation (QUWF), today jointly announced their partnership in the support of QUWF chapters and members to support the ongoing battle to restore and keep wildlife habitat across the U.S. “Supporting an American company with the core values and direction that match ours is a benefit unto itself. Finding the right equipment in their high quality cooler line to assist in habitat work at all levels, events, youth programs, field research all while enjoying the outdoors is exceptional” states Craig Alderman of QUWF. “Being a Veteran Founded and managed company, we are delighted that we can get behind and support an American company managed by a great family” Craig continued. “At every turn of habitat work from fencing, access and egress work, timber stand improvement, food plots or tractor work you have to have high quality coolers. They assist to hydrate the volunteers, bring and preserve the food and we know they are the best in features for the field, the hunting camp and will last” reflects Craig.

“Partnering for wildlife is a natural direction for Cordova Coolers. Our products are specifically designed with superior features to last a lifetime but not break the sportsman’s bank” states Scott Campbell of Cordova. “We proudly make them in the U.S.A. and cannot think of a better way than to work with a veteran’s drive to make a difference for wildlife across the country, getting youth outdoors and promoting hunting in general” Scott said. “We are also pleased to announce our cooler line will be the exclusive cooler of QUWF and featured for the new QUWF

Wildlife Habitat Wagon as an essential accessory for habitat field work. Further, Cordova will be the preferred coolers in combination with QUWF Doolittle Trailers for youth shooting events, habitat work and banquets.

“We keep coolers in our trucks at all times” states Nick Prough Chief Wildlife Biologist at QUWF. “You just do not know how valuable they are until you work in habitat, have outside events or like to hunt or fish. The features of the Cordova coolers are the best and we are thankful for such a great tool added to our habitat work tool box. Then Cordova coolers provide exceptional recreational use at all levels” Prough explains. “It is a further point of pride knowing they are made in the U.S.A. and a great family company” Prough concludes.

As of January 2016, QUWF and its local chapters and members have impacted 3.2 million acres of wildlife habitat and its chapters spent over \$152 Million Dollars in their local communities. That is “Turn-in-the-Dirt™”.

Quail and Upland Wildlife Federation, Inc.™ is the only Disabled American Veteran Founded, tax exempt 501(c)(3) conservation organization in the U.S., serving its members and chapters nationwide. QUWF provides a strong local source of habitat focus on all upland wildlife with population recovery. Millions of dollars of habitat work have been completed by its members over the years on millions of acres of both private and public lands. That work continues with a renewed vitality. Our chapters from coast to coast, provide the grass roots, local habitat work that is making a difference each and every day.
